

I believe Local Number Portability is good for the consumer. I have had the same mobile number for the past 3 years. Everyone I know knows my mobile number and if I were to switch from Sprint to Verizon (or Verizon to Sprint) I would lose the phone number. This limits my choices and locks me into one of these customers.

I like the fact that I can do this on my normal phone. I have moved 3 times with the same phone number.

Thanks,  
Ray Jessup
